

A good impression of the best lifecast

Cavex CleverCast Premium Alginate is based on a unique combination of high-quality ingredients to create an ideal alginate for making impressions of hand, foot, face or any other body part. One feature that makes Cavex CleverCast “smart” is the flexible mixing ratio, which makes it possible to create a mix that perfectly suits your casting style. In addition, Cavex CleverCast is very user-friendly due to the easy mixing with a minimum of air bubbles and lumps, the smooth consistency of the mixture and the unparalleled elasticity and tear strength. The alginate print ensures a very detailed reproduction and thus the ideal basis for an excellent casting result.
